## FEATURES

---

### CLASSIC STYLING

The essence of the Core is in the superior comfort and support of foam-over-mesh back construction designed into a thin sleek profile. An inner structural frame and mesh provides the flexible support of a mesh back while the soft molded foam cushion provides classic comfort. Finish this off with a durable plastic outer back with adjustable ratchet makes Core the foundation for any office.

### TWO CONTROL OPTIONS

Included is a weight-balance control that will self-adjust the back tension to your body weight and movement. Additionally, a knee-tilt control is available with side tension adjustment and multiple tilt lock positions. The Core can be personalized to meet the ergonomic needs for work stations, collaborative spaces and everything in between.

### **6-WAY ADJUSTABLE ARMS**

Contemporary, sleek and with the same accent colors as the back and base, the 6-way adjustable arms show great design with ergonomic performance.

### **W1 CONTROL**

A new “sit and forget” weight-balanced control that utilizes the weight of the user to balance the back tension. The control has a 3:1 back-to-seat synchronous movement with two back lock positions – perfect for conference areas or passive user applications.

### **DESIGNERS' CHOICE BASE AND CASTERS**

Newly designed mid-profile nylon base sits atop color matched 60 mm hubless casters to finish the distinctive style that is Core. Available in black or polished aluminum.
